WELCOME TO VITRUM25

The world is changing fast, and with it the challenges and responsibilities of those who do business are changing. In this constantly evolving scenario, **Vitrum 2025** presents itself as a benchmark for the glass sector, with a broader and more inclusive vision, capable of combining advanced manufacturing, industrial

innovation and international cooperation.

This edition marks the beginning of a new strategic cycle that looks to the enlarged Mediterranean as a space for development, exchange and growth. A geographic area that today more than ever represents a key crossroads between Europe, Africa and Asia. It is in this direction that Vitrum is oriented, assuming the role of a hub connecting businesses, institutions and territories.

Vitrum 2025 is an ecosystem that tells of the strength and richness of the Italian glass industry:

- With the presence of **major manufacturing and processing companies**, such as Saint Gobain, Pilkington and Glass Group;
- **With the involvement of key players in the supply chain**, from plant manufacturers to the most innovative component and automation companies;

- With the fundamental contribution of **research and training centers** - such as the University of Trento, IUAV University, and the Glass Experimental Station - that bring expertise, vision and the future to the exhibition;
- And with the support of Italian and international institutions, **ICE, SIMEST, Assovetro**, which confirm the strategic value of Vitrum for our country system.

Special attention is paid to all glass sectors, because the challenge of decarbonization, innovation and international attractiveness concerns the entire sector. That is why, alongside technologies and materials, there is room for dialogue, technical culture and training, elements that are essential today to remain competitive.

Vitrum 2025 is the fair of glass, but also of vision. It is the place where our industry tells its story with strength and pride, opening itself to the world with a collaborative and strategic spirit. It is with this in mind that we welcome you to an event that wants to be much more than an exhibition event: it wants to be the engine of a new phase of growth for the glass industry, in Italy and beyond.

Enjoy your visit and good work.

Dino Zandonella Necca
President of Vitrum

Fiera Milano Rho, Pav. 9-11, 16th-19th Sept. 2025

VITRUM
25
at the heart of
glass

WELCOME TO VITRUM25

Dear Exhibitors,

On behalf of **ICE – the Italian Trade Agency for the promotion abroad and the internationalization of Italian companies** – it is my great pleasure to welcome you to this new edition of **Vitrum25**.

This prestigious international event represents a key meeting point for the glass processing sector, where excellence, innovation, and know-how from Italy – and beyond – come together.

As a government agency committed to the economic and commercial development of Italian companies in foreign markets, and working in synergy with the Ministry of Foreign Affairs and International Cooperation, we promote Made in Italy by showcasing the skills and technologies of our diverse production sectors.

The Capital Goods Office, in particular, plays a strategic role in supporting Italian companies in the mechanical and manufacturing sectors, with special attention to high-tech fields such as automation, robotics, and of course, glass processing.

Since 2015, we have proudly supported Vitrum with dedication and enthusiasm, recognizing its value as a qualified global platform for matching supply with demand. Our support

includes organizing incoming missions of foreign operators, carefully selected from among buyers, distributors, and strategic partners in the most dynamic markets, as well as conducting communication campaigns and networking events.

All of this is made possible by our global network of over 80 offices abroad, operating in key international markets to help Italian companies identify potential clients, distributors, and commercial partners. This worldwide presence is a crucial tool to strengthen the effectiveness of our promotional activities and to support companies throughout their internationalization journey.

We firmly believe that incoming activities are a decisive means of enhancing the international visibility of Italian companies and generating real business opportunities. Connecting Italian technological excellence with key stakeholders from around the world helps facilitate exchange, build lasting relationships, and reinforce Italy's position as a hub of innovation and quality.

We thank Vitrum and all of you, the exhibitors, for contributing to the promotion and enhancement of Italy's industrial system.

We wish you a productive visit, rich in inspiration, contacts, and new growth opportunities.

Warm regards,
Luca Durante
Director, Capital Goods Office
ICE – Italian Trade Agency

INNOVATION AT THE CORE: GIMAV's New Service Concept

In 2026, GIMAV is set to usher in a new era of services designed to support member companies in an increasingly complex, competitive, and interconnected international landscape. Building on a tradition that began in 1980, GIMAV is evolving into a modern, dynamic association—one that anticipates global trends and guides Italian glass technology companies along a path of structured, sustainable growth.

The keyword for GIMAV's future is **integration**. Services are no longer separate modules but part of a true, synergistic ecosystem capable of addressing business needs across the board: from research and development to internationalization, training, and organizational well-being. This vision takes shape through new thematic service desks designed to provide continuous, personalized, and strategic assistance. Each desk serves as an access point to specialized resources and industry know-how, helping consolidate the technological leadership of Italian companies worldwide.

In 2026, the **Internationalization Desk** will be enhanced with an integrated system for market scouting, tailored mentoring, and access to international partnerships. In addition to traditional consulting, a new active monitoring service for emerging markets will be introduced, with a focus on high-potential regions such as Saudi Arabia, Turkey, India, and Mexico. Through targeted international missions, GIMAV will organize country-specific days featuring B2B meetings between selected buyers and Italian companies, as well as direct visits to

production facilities. These initiatives represent a tangible boost to exports and the creation of lasting commercial relationships.

To support informed decision-making, GIMAV will launch an upgraded version of its **Observatories** in 2026. The **Geopolitical Observatory** will integrate predictive analysis, country-risk assessments, and political-economic scenario planning, while the **Market Observatory** will offer business intelligence tools, dynamic reports, and real-time sector forecasts. These platforms will become strategic springboards for companies, providing key data to guide investments and commercial strategies.

In the evolving regulatory and social context, GIMAV is expanding its **ESG Desk**, offering comprehensive ecological transition pathways—from energy audits to support in obtaining environmental certifications (ISO, EPD, etc.). In 2026, this desk will also serve as a green innovation incubator, promoting best practices, case studies, and a network of experts to help companies tackle both the ecological and digital transitions in a coordinated, sustainable way.

In collaboration with MA.DE., GIMAV will offer an enhanced digital transformation service that goes beyond consulting, providing operational guidance toward automation and Industry 5.0. New training programs, combined with on-site interventions, will help companies adopt advanced technologies such as artificial intelligence, sensors, and predictive maintenance.

The **Finance Desk** will become a European project hub: in addition to funding searches, it will offer support in co-design, management, reporting, and fund optimization. Special attention will be given to accessing PNRR, Horizon Europe, and InvestEU funds, fostering collaborative innovation between business and research. A new dedicated team will provide tailored legal assistance, including for complex international operations. GIMAV will act as a bridge between companies and legal certainty, offering rapid, specialized responses.

In 2026, GIMAV will completely renew the **Glass Academy**, establishing it as a permanent training center for the glass sector. Alongside technical and management courses, modules will be introduced on corporate well-being, leadership, change management, and social sustainability. Through the **GIMAV Welfare Portal**, companies will gain access to services for organizational well-being, workplace climate assessment, apprenticeship management, and payroll.

GIMAV aims to be an active agent of transformation in the sector. The goal is not only to promote Italian glass technologies but also to create a cohesive, competitive, and visionary network capable of facing major global challenges. Italy—already a world leader in innovation and quality, with over 70% of revenue generated abroad—will be increasingly recognized as a model of integrated excellence. Strategic collaborations with Glasstec, NGA, and Fiera Milano will continue to strengthen its strong, high-profile international visibility.

The year 2026 marks a key milestone for GIMAV: from a representative association to a platform for growth, innovation, and internationalization for Italian glass companies. A modern structure, with concrete services designed for tomorrow's challenges. Because excellence doesn't happen by chance—it's built, together.

BEST TECH AWARDS 2025

CELEBRATING INNOVATION AT VITRUM!

The **Best Tech Awards** return to **VITRUM 2025** to reward the most innovative technologies in glass processing, voted for directly by visitors. Four categories in the competition – from flat glass to automation and software – highlight the excellence and creativity of companies in the sector.

Visitors to VITRUM 2025 have the power to decide: they can vote directly for the technologies in the competition using QR codes available both at the company stands and in the official exhibition guide.

The project with the most votes in each category wins a voucher worth **€10,000**, to be used for participation in the next edition of VITRUM.

After the voting closes, an official ceremony will be held at the end of the four days, during which the winners will be announced and important institutional figures will also be present.

We would like to remind you that, in the last edition in 2023, the awards were given to:

- **TECNOVATI COM S.r.l.** in the Accessories, Components & Other Glass Technologies category (with its “Tecno Sunblock” glass)
- **SOFTSOLUTION GmbH** in the Software, VR & AI category, thanks to AI-based innovations for smart scanners
- **ADELIO LATTUADA S.r.l.** in Robots & Automation, with high-speed robotic solutions on mobile tracks
- **FOREL S.p.a.** for Flat Glass Technologies, with patented tools for flat glass, including thermoplastic profiles and innovative insulation lines

SCAN TO VOTE!

1. Flat Glass Tech Award
2. Robots & Automation Award
3. Software, VR & AI Award
4. Accessories, Components & Other Glass Tech Award

VITRUM BEST - TECHNOLOGIES

FLAT GLASS TECH AWARD

1	ADELIO LATTUADA S.r.l. - LIMITED EDITION edger mod. TLR 12 C PC
2	CUGHER GLASS S.r.l. - Screen Printing Machine with Vision System
3	FOREL S.p.a. - Arrissing-Edging Machines EG-EM
4	FRATELLI PEZZA S.r.l. - Multishading Mistral EV+ - Automatic Sandblasting machine for glass and mirror 4.0 (new integrated software solution)
5	GLASS COMPANY S.r.l. - LASER ALL-IN-ONE: High-precision, versatile glass ablation, drilling and sandblasting
6	GLASS COMPANY S.r.l. - Automatic horizontal applicator
7	GLASS COMPANY S.r.l. - GlassSpacer: transparent glass spacers for double glazing FULL VISION
8	HEGLA GmbH - Thin Glass Cutting Line for the production of slim IGUs
9	HEGLA GmbH - High Automated Cutting Machine for LSG
10	ITECH S.r.l. - Two-blade profile cutter - complementary machine used in the production of double glazing
11	KERAGLASS S.r.l. - VISION 800 - Oscillating furnace for tempering flatglass
12	KERAGLASS S.r.l. - COMBI - Multi-level kiln for laminating glass
13	MAPPI INTERNATIONAL S.r.l. - MAPPI FOX EVO: compact smart furnace for tempering flatglass
14	SCHIATTI ANGELO S.r.l. - Vertical milling and drilling machines mod. TFV1600

ROBOTS & AUTOMATION AWARD

15	ADELIO LATTUADA S.r.l. / WALDEMAR KNITTEL - Glasbearbeitungs GmbH- LRS Lattuada/Knittel Robotic Solutions: fully automated and integrated high-speed glass processing robotic lines, featuring a fully automatic edger mod. TLR 12 C PC automatically loaded/unloaded by a KUKA robot installed on a seventh axis.
16	FOREL S.p.a. - Sorting system for automatic unloading of the finished panel

SOFTWARE, VR & AI AWARD

17	ADELIO LATTUADA S.r.l. - Orchestra IIOT Data Manager platform for production management
18	BAKA GLASS SOFTWARE - Production software
19	CYNCLY - Software - FeneVision ERP Software for Windows, Doors, and Glass
20	DELTAMAX AUTOMAZIONE S.r.l. - Optical system for in-line detection of defects in double glazing

21	DENVER S.p.a. - Pilot EVO Software
22	FRATELLI PEZZA S.r.l. - MISTRALAPP Software for automatic sandblasting machine for glasses and mirrors 4.0
23	GLASS COMPANY S.r.l. - SOFTMEK: Software for calculating the position of cuts in Low-E conductive coating using lasers to produce heated glass
24	HEGLA GmbH - Glass365 - Intuitive and intelligent ERP system for the glass industry
25	OPTIMA S.r.l. - Opty-way Enterprise ERP/MES Industry 5.0 Ready. Modular solution for vertical and horizontal integration of business and production processes
26	SOFTSOLUTION GmbH - Comprehensive Optical Inspection / Osprey@25

ACCESSORIES, COMPONENTS & OTHER GLASS TECH AWARD

27	BEIJING HUATAI YINHAI INTL. BUILDING MATERIALS Co. Ltd. - Aluminium spacer bar
28	CHENGZHEN MIRROR INDUSTRY Co. Ltd. - Antique mirror
29	CSI - Composite Solutions and Innovations Ltd. - Composite impeller for glass tempering
30	FANGDING TECHNOLOGY Co. Ltd. - Thermoplastic Polyurethane Film
31	GLASS COMPANY S.r.l. - LEVELMEK - Measurement System for Roll-Induced Distortions on Tempered Glass
32	GLASS COMPANY S.r.l. - Polariscopes: Portable for tensions in tempered glass and digital bench-top for internal tension analysis
33	GLASS COMPANY S.r.l. - Digital spectrophotometer used to accurately evaluate IR, UV, and VL transmittance parameters
34	GLASS COMPANY S.r.l. - Digital thickness measuring device used to measure the thickness of various types of glass and double glazing
35	GUANDONG ITALIA S.r.l. - "Il vetro che parla" - glass decorated using techniques such as embroidery and lace on glass, 'glass that communicates' with an inkjet printer demonstration
36	HENAN HENGLI REFRACTORY MATERIAL Co. Ltd. - Refractory bricks
37	QINGDAO KINGSTONE GLASS PRODUCT Co. Ltd. - Laminated glass
38	R.C.N. SOLUTIONS S.r.l. - RD Clean Concept
39	SI. STE TRADING S.r.l. - Leica Geosystems digital production measurement system
40	TECNOVATI COM S.r.l. - Tecno Sunblock - vetro termocromico
41	VETROMAC S.r.l. - Rotary tool change for operations during the cutting cycle
42	ZHAOQING KEQIU IMPORT AND EXPORT Co. Ltd. - No Glass Drilling Required, Self-Closing shower hinge
43	ZHEJIANG COLOR PVB Co. Ltd. - Architectural-grade PVB interlayer films offering sound insulation and thermal performance
